

### Relocating machines ... with zero damages

At KL INDUSTRIAL SERVICE we provide moving and relocation turnkey solutions for all types of machinery to all types of businesses. We have professional electrician, technician and movers who are experienced and our expertise in the field of machinery relocation includes the decommissioning and decontamination of old machinery (move-out) and the transport and commissioning of new machinery (move-in) for small- and large scale factories and other type of industrial businesses. If *500KG* or *500tons*, from overseas to your factory floor or simply from the ground floor to the 1st floor, no project is too challenging for our experienced team and own heavy duty equipment.

### ONE OF THE BEST IN THE INDUSTRY

KL INDUSTRIAL SERVICE HAS ONE OF THE BEST HSE TRACK RECORDS RELATED TO HEALTH, SAFETY AND THE ENVIRONMENT

### Health, safety and environmental protection

At KL INDUSTRIAL SERVICE, we are deeply committed to health and safety. That is why we adhere to best-practice standards, consistent employee training, performance metrics and auditing to continually meet the high-level of performance we are known for. We consistently achieve industry-leading performance in employee safety. Equally important are the safety of the environment and clients property, and the prevention of damages to machinery, equipment and buildings. Additionally, our mission aims to promote and protect the optimal health of our employees, within a safe and healthy work environment on site. With an incidence rate of less than 0.2% since 2015, we maintain a nearly perfect record for HSE and a zero damage rate to our client's machinery or property that we uphold proudly.

### Turnkey relocation service

We understand our clients' need to rely on the expertise of a professional company. KL INDUSTRIAL SERVICE has all the required skills, experience and equipment to ensure relocation or the moving of just one machine or an entire facility is accomplished according to budget and schedule with a minimum down time to operations. **Turnkey relocation solutions from a single machine to relocating an entire factory - on budget and time. Every time.**

**Interested? Let's talk.**
